The Archway Investment Fund - Fixed Income Portfolio Bryant University

Monthly Report Data as of 6/30/2024

Fund Objective

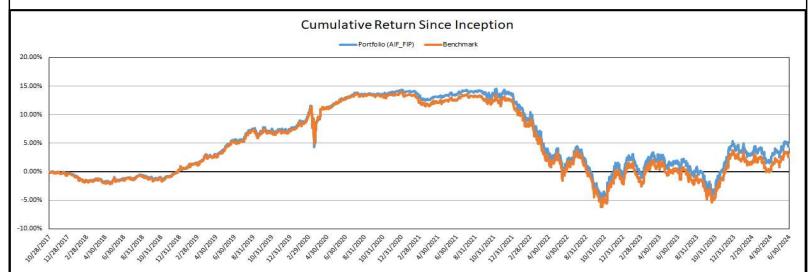

The primary objective of the Archway Investment Fixed Income Fund (the Fund) is to provide students in Bryant University's Fixed Income Portfolio Management course with a hands-on learning experience. The Fund launched on October 27, 2017 with \$500,000. After including subsequent capital inflows and outflows, the net capital contribution is \$815,000.

Investment Strategy

The Fund seeks returns from income and price appreciation, in excess of its Benchmark, while maintaining a volatility less than 120% of that of its Benchmark. The Benchmark was changed from the Fixed Income ETF GVI to the Fixed Income ETF AGG, which broadly tracks the Bloomberg Barclays Aggregate Index, on September 30, 2021. That index includes fixed rate debt securities priced in USD and traded in the US market, that are issued by the U.S. Treasury, U.S. government agencies, U.S. corporations, and taxable debt issued by sovereign, supranational and local government entities rated investment grade. It also includes highly rated MBS, CMBS and ABS securitized credit tranches. The benchmark was chosen for its diversification, and its use as a benchmark for both active and passive core fixed income portfolios. The tracking error of the portfolio versus its benchmark, defined as the annualized standard deviation of excess returns, is kept below 2%. Historical benchmark return and risk metrics use a chained return series reflecting the benchmark in use at the time.

Performance Commentary

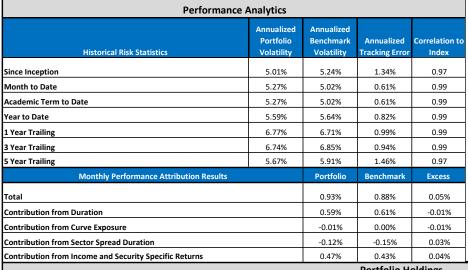

The Archway Fixed Income Portfolio returned 0.93% during June, while the benchmark returned 0.88%. Economic data releases during the month of June were mixed. Inflation appears to have stabilized and various spending and productions data releases pointed to a slowing economy. The Federal Reserve met in July and made no changes to the Federal Funds target band. Commentary indicated that Fed officials remain concerned about inflation and that any rate adjustments in 2024 are going to come toward the end of the year. Nonetheless, the markets priced in two rate cuts for the year, and the Treasury yield curve moved lower. The rally stalled with a bearish curve steepener on the last trading day of the month. For the month overall, the 2-year yield fell by 12 bps, the 5-year yield fell by 13 bps, the 10-year yield fell by 9 bps. The portfolio and benchmark are close to each other, and curve exposures are relatively small. The duration and curve exposures contributed -0.01% and -0.01% in alpha for the month. The portfolio is overweight in duration in the Treasury, Agency, and MBS sectors, while it is underweight in investment grade corporates. These exposures contributed 0.03% to alpha during the month. Income and security selection contributed 0.04% in alpha to the portfolio during the month. For the year thus far, the portfolio has returned -0.49%, while the benchmark returned -0.71%. Since its inception in October 2017, the portfolio has an annualized return of 0.64% and outperformed the benchmark by 0.25%. There were no trades in the portfolio in the month of June.

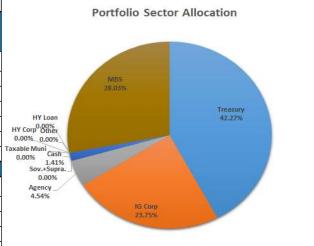

Investment Perforn	Portfolio and Benchmark Characteristics

Performance data is calculated from the official portfolio valuation data provided by National Financial Services LLC, the custodian for the Fund's Fidelity Brokerage Account. Additional security price and analytic data has been obtained from Bloomberg LP. Returns for the portfolio and benchmark include reinvestment of income distributions, and realized and unrealized gains. Returns have not been audited.
